

Flexible Stone Panels

Product Brochure

Nature reimaged. Limitless possibilities.

1. About Our Flexible Stone Panels

Our Flexible Stone Panels are made from 100% genuine natural slate, processed into ultra- thin, bendable veneers that retain authentic mineral texture and natural beauty while breaking the limits of traditional rigid stone. Ideal for modern architecture, interior design, and curved surfaces, they blend elegance, durability, and creativity into one premium building solution.

As a professional manufacturer, we combine advanced production technology, strict quality control, and sustainable materials to deliver lightweight, eco- friendly, and high- performance stone panels for global projects.

2. Core Advantages

Genuine Natural Texture

Authentic stone veins and surface finish, no fake plastic look.

Ultra- thin & Lightweight

Much lighter than conventional stone, reducing structural load and transport cost.

High Flexibility & Bendable

Perfect for arcs, columns, curved walls, and irregular shapes.

Waterproof & Weather- Resistant

Stable under humidity, rain, and temperature changes; suitable for interior and exterior use.

Fireproof & Eco- Friendly

Safe, non- toxic, low carbon, compliant with green building standards.

Easy & Fast Installation

Peel- and- stick or simple adhesive installation; no heavy tools or complex construction.

Cost- Effective

Lower overall cost than natural stone slabs, with better design adaptability.

Certified Quality

ISO 9001, ISO 14001, ISO 45001 certified for global market supply.

3. Typical Applications

Interior: feature walls, living rooms, bedrooms, ceilings, columns, reception counters, furniture surfaces.

Exterior: building facades, villas, hotels, shopping malls, curved exterior walls.

Commercial: offices, restaurants, showrooms, public spaces, old building renovation.

Special: 3D decor, art installations, lightweight cladding, tabletop finishes.
